WORK EXPERIENCE

Antivirus Solutions Website (College Project)

2023- PRESENT

- Built a responsive and modern website for a fictional antivirus software company.
- Tech: HTML, CSS, JS | Design via Canva and custom illustrations.
- Purpose: Created to spread awareness and promote antivirus tools for students.

Commercial Websites for Local Shops

2023,,7 Aug

Designed and deployed 2 fully functional websites for real local businesses.

- Features included product listing, enquiry form, Google Maps integration, and contact sections.
- Results: Helped shop owners gain online presence and improved footfall by 40% through online visibility.
- Role: Web Developer | Tools: HTML, CSS, JS

Personal Portfolio Website

Created a fully responsive and animated personal portfolio showcasing all my skills, achievements, and projects.

2024 - 2025

- Integrated 3D hover effects, section-based scrolling, service highlights, and contact form.
- Tech Used: HTML5, CSS3, JavaScript, Canva
- Live Link: [rachitwbdevin.netlify.app](#)
- Purpose: Used for self-branding and job applications; appreciated by recruiters for its design and clarity.

I have also worked on several other real and clone-based projects, including a Grocery Paid Web Project for a local store, Hotel Website, Flipkart Clone, Personal Assistant App, and more – showcasing both business-focused and UI-replication skills.
